-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 - 11, drawn to a system for creating and maintaining information in a database of subjects using a plurality of natural language terms and rating the degree of relevance of each of such natural language terms, classified in class 704, subclass 9.
 - II. Claims 12, 13 and 35 – 41, drawn to an Internet website client-server computer system to determine a level of subjects and degree of relevance, classified in class 707, subclass 10.
 - III. Claims 14 – 29, drawn to a business system to manage the direct collection of sponsor revenue, classified in class 705, subclass 51.
 - IV. Claims 30 – 34, drawn to a searchable database of defined categories of subjects having interface processing means for assisting user to choose from plurality of terms, classified in class 707, subclass 4.

The inventions are distinct, each from the other because of the following reasons:

Inventions listed as Group I, Group II, Group III and Group IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention has separate utility such as follow.

Group I: A system for creating and maintaining information in a database of subjects using a plurality of natural language terms and rating the degree of relevance of each of such natural language terms.

Group II: An Internet website client-server computer system to determine a level of subjects and degree of relevance.

Group III: A business system to manage the direct collection of sponsor revenue.

Group IV: A searchable database of defined categories of subjects having interface processing means for assisting user to choose from plurality of terms
See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III and IV, the search required for Group II is not required for Groups I, III and IV, the search required for Group III is not required for Groups I, II and IV, and the search required for Group IV is not required for Groups I, II and III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2162

A telephone call was made to Benjamin Erlick on June 27, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
